IDENTIFIERS Connecticut; Maine; Massachusetts; *New England Regional Student Program; New Hampshire; *Out of State Students; Rhode Island; Vermont

ABSTRACT

Enrollment statistics for 1978-79 participation in the New England Regional Student Program are presented. The program is designed to provide residents of the New England states (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont) with programs of study at out-of-state institutions for in-state tuition cost (or in some cases 25 percent more than the in-state fee). The ruling condition is that the program of study is not available in the student's own state. Information is divided into the following categories (and further broken down into state): students attending two-year colleges and institutes, students attending state colleges, students attending the six state universities and the University of Lowell and Southeastern Massachusetts University, and students in the health professions contract program. Among findings of the study were that there was an increase of almost seven percent in the number of students enrolled in the program for the academic year 1978-79, that enrollment in non-contract study programs increased by over eight percent, that enrollment is highest in the field of Pharmacy, and that 631 degree programs are being used under the program at 63 colleges and universities in the region. NEW ENGLAND BOARD OF HIGHER EDUCATION

New England Regional Student Program

Enrollment Report 1978-79

NEW ENGLAND BOARD OF HIGHER EDUCATION
40 Grove Street, Wellesley, Mass. 02181

Dear Reader,

A central concern of the New England Board of Higher Education is the development of optimum access to higher educational opportunities in the region. A related concern is the avoidance of costly duplication of effort in academic programming.

The New England Regional Student Program is a major element in the Board's program to meet these twin objectives. It would be fair, I think, to regard it as the quintessentially collaborative effort conducted among public higher education institutions of the region.

Under the program, several thousand college and university students in New England enroll in programs outside their own state and pay either the resident fee or, in some instances, 25 percent more than the in-state fee. The ruling condition is that the program of study is not available in the students' own state. What is more, most of these student applicants receive admissions preference among out-of-state applicants.

Interest and participation in the program are growing steadily. I'm sure that distribution of these reports serves to advance that growing interest. At the same time, I want readers to know that the Board welcomes comments and questions about the program. We are confident it is seen as a well-conceived, well-run program — and for that I commend Jeanne Burns and her staff, Dr. Robert E. Miller and members of the Regional Student Program Advisory Council he chairs, the administrators of 83 participating public institutions, and concerned state officials. We remain interested in improving participation in and awareness of the Regional Student Program.

So please let us hear from you.

John C. Hoy
Executive Director
New England Board of Higher Education

NEW ENGLAND REGIONAL STUDENT PROGRAM

ENROLLMENT REPORT

HIGHLIGHTS 1978-79

.... An overall increase of 262 students, or 6.59 percent, for a total of 4,242 students enrolled in both areas of the Program

.... Enrollment in non-contract study programs increased by 8.33 percent (297 students), for a total of 3,862

.... Enrollment shows use of 631 degree programs at 63 of the region's public colleges and universities

.... Largest single-institution enrollment under the Program is at the University of Rhode Island

.... Enrollment is highest in the field of Pharmacy

THE NON-CONTRACT PROGRAM

Enrollment in the non-contract area of the Regional Student Program continues to grow steadily. This year, Program enrollment increased by 8.33 percent - 297 students - for a total of 3,862. This percentile increase is particularly significant when compared to the overall increase at the region's public colleges and universities of only 0.26 percent, according to preliminary 1978-79 enrollment data published by the National Center for Educational Statistics (NCES). Regional Student Program enrollment constitutes a very low proportion (generally below 1.00 percent) of total enrollment in New England's state-supported colleges and universities; as is indicated by the chart on the following page, however, the enrollment of regional students over the past five years has grown at a rate greater than that for total public enrollment. As the general growth rate slows, enrollment under the Regional Student Program gains in significance as a component of the region's pre-eminent public higher education system.

The largest increase in regional student enrollment occurred this year at the region's public two-year colleges and institutes, where 226 (21.69 percent) more students were reported enrolled than in 1977-78. Massachusetts community colleges enrolled 675 (53.23 percent) of the 1,268 regional students at these institutions. Significant increases in regional enrollment were also experienced by the state colleges; Connecticut, Massachusetts, New Hampshire and Vermont all reported higher enrollment for a total of 598 students, a 17.50 increase over last year. The Vermont State Colleges showed both the largest enrollment and the largest increase in enrollment; regional students totalled 288 at Castleton, Johnson, and Lyndon.

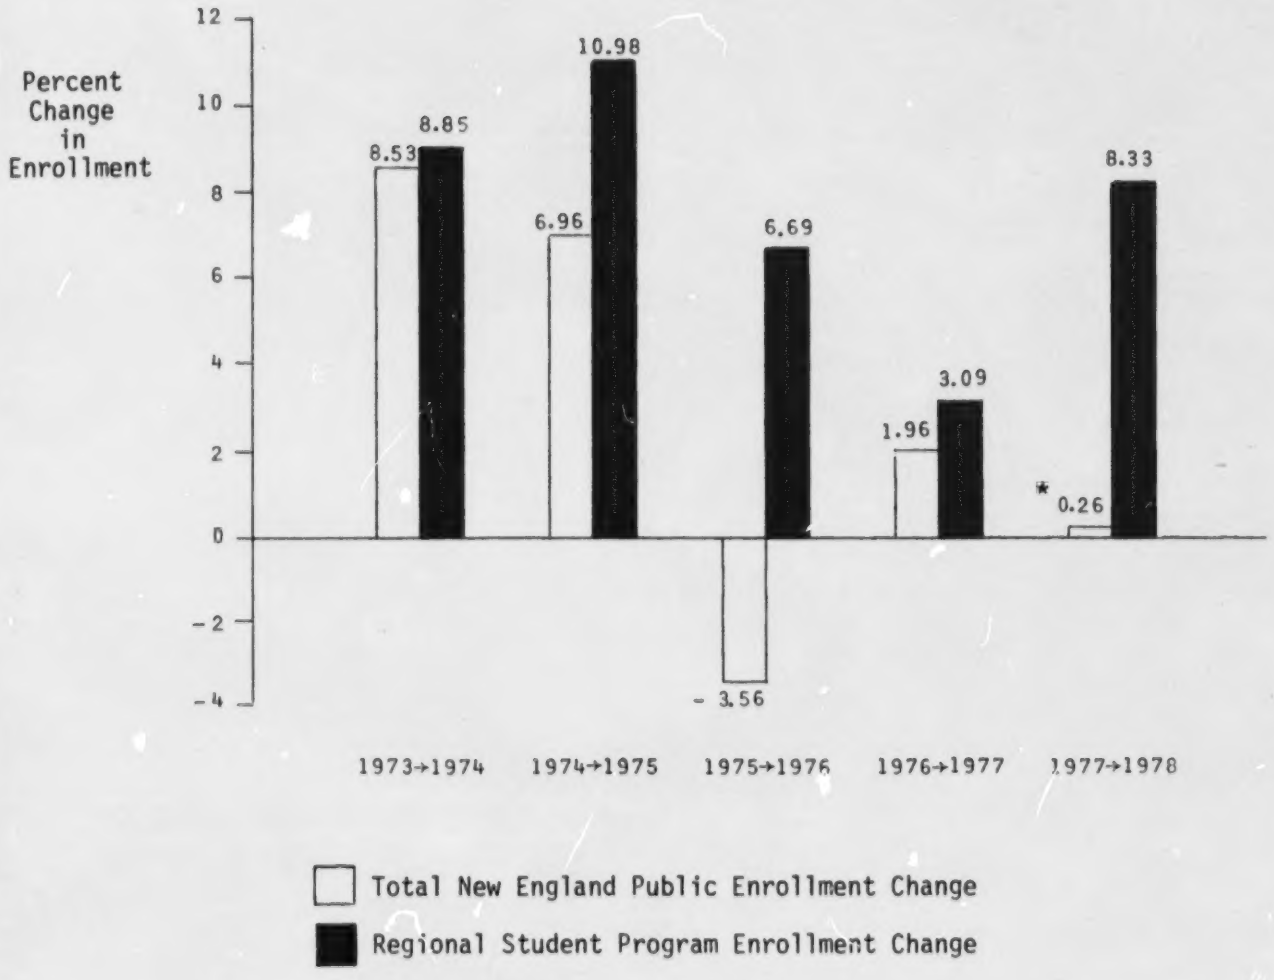
Increases in the number of regional students at the university undergraduate level were reported by three states this year: Massachusetts (25 students), New Hampshire (21 students), and Rhode Island (7 students). These

NEW ENGLAND REGIONAL STUDENT PROGRAM

COMPARISON OF TOTAL NEW ENGLAND PUBLIC ENROLLMENT GROWTH

AND REGIONAL STUDENT PROGRAM ENROLLMENT GROWTH,

FALL 1973 THROUGH FALL 1978



Source: Regional Student Program Enrollment: New England Board of Higher Education (NEBHE).
Total Public Enrollment: NEBHE Analysis of NCES Data.
*NCES Preliminary Estimate For Fall, 1978.

increases were offset by reduced enrollments of 5 at the University of Vermont, 8 at the University of Connecticut, and 62 at the University System of Maine, for a net decrease of 22 students, or 1.46 percent, at the university undergraduate level. A slight increase - 4 students - at the university graduate level brought Regional Student Program enrollment at New England's public universities to 1,996 students, a decrease of 0.89 percent from 1977-78 figures. A full 25.00 percent of those regional students were reported enrolled at the University of Rhode Island, giving that institution the distinction of the highest Regional Student Program enrollment for 1978-79.

Regional students are enrolled this year in 691 of the 1,193 individual degree programs offered by New England's institutions under the Regional Student Program. The enrollment of 15 or more regional students was reported in 58 programs, 13 at two-year colleges and institutes, 7 at state colleges, 20 at the university undergraduate level, and 7 at the university graduate level. Most of these programs have traditionally attracted large numbers of regional students. At the bachelor degree level, for example, Pharmacy programs once again enroll the largest numbers; the University of Connecticut reports 117 regional students, and the University of Rhode Island 166. The University of Southern Maine reports 86 regional students in its Criminal Justice program this year, and 93 of the 137 regional students enrolled in Recreation programs are studying at Lyndon State College in Vermont. Journalism, Special Education, and Meteorology continue to be among the most popular bachelor degree programs, as does the Hotel Administration program at the University of New Hampshire and the comparable program, Hotel, Restaurant, and Travel Administration at the University of Massachusetts at Amherst. The number of regional students enrolled in Forestry has declined from 133 in 1977-78 to 70 in 1978-79.

At the two-year colleges and institutes, the large majority of regional students have enrolled under the terms of the "proximity rule"; they are enrolled in out-of-state institutions which are closer to their homes than in-state institutions offering the same field of study. Of the 232 regional students enrolled in Northern Essex Community College in Massachusetts, 228 are from the bordering state of New Hampshire. All 284 students enrolled in Rhode Island Junior College under the Regional Student Program are Massachusetts residents. Liberal Arts, Business, and Social Service programs are among the most popular programs at the two-year level, as are programs which provide training in the health feilds, in various construction-related technologies, and in computer technology.

At the graduate and professional level, the University of Connecticut reports 49 students enrolled under the Regional Student Program in its program leading to the MSW degree, and regional enrollment in the University of Rhode Island's Master of Library Science program has increased to 55. The Law programs at the University of Maine and the University of Connecticut continue to draw large numbers of regional students, as do doctoral degree programs at the University of Connecticut and the University of Massachusetts at Amherst.

State Participation

Massachusetts continues to make the greatest use of the Regional Student Program, both in terms of the numbers of students it imports and the number it exports. The 1,316 regional students enrolled in Massachusetts institutions constitute 34.1 percent of the Program's total enrollment for 1978-79, while the 1,237 Massachusetts residents enrolled elsewhere account for 32.0 percent of the "residence totals."

NEW ENGLAND REGIONAL STUDENT PROGRAM

Migration By State

STATE	1978-79 IN	1978-79 OUT	1978-79 NET FLOW	1977-78 NET FLOW
Connecticut	457	982	525 Out	450 Out
Maine	474	251	223 In	359 In
Massachusetts	1,316	1,237	79 In	56 Out
New Hampshire	345	591	246 Out	311 Out
Rhode Island	845	439	406 In	396 In
Vermont	425	362	63 In	62 In

Both Massachusetts and Vermont approach balance in terms of in-migration and out-migration; Massachusetts records a net in-migration of 79 and Vermont a net in-migration of 63. This is the third consecutive year in which Massachusetts has reached near balance, and the second for Vermont. Rhode Island and Maine once again rank first and second as net importers of students under the Regional Student Program. Residents of these two states continue to make relatively little use of the programs open to them under the Regional Student Program; students from Maine are enrolled in only 114 (22.4 percent)

of the programs open to residents of that state, while Rhode Islanders have taken advantage of 160 (26.3 percent) of the programs offered to them. Connecticut and New Hampshire maintain their net exporter status. Connecticut offers a large number of programs (323) under the Regional Student Program; regional students, however, are enrolled in only 105 (32.5 percent) of those programs. By contrast, New Hampshire makes available regionally only 105 programs, but shows enrollment in a full 74.5 percent of those programs.

The charts on the following pages summarize each state's participation in the Program for 1978-79.

THE CONTRACT PROGRAM

Decreases in the numbers of students enrolled in undergraduate programs in Occupational and Physical Therapy led to an overall enrollment decrease of 8.43 percent (35 students) this year, for a total of 380 students enrolled under NEBHE-administered student space contracts.

Under the terms of the Occupational and Physical Therapy Contract Program, private institutions within the Commonwealth of Massachusetts agreed to expand the number of Massachusetts residents enrolled in those fields. Monies received from the Commonwealth are distributed to students on the basis of financial need. Enrollment in Boston University's and Tufts University's Occupational Therapy remains high; because, however, of increasing educational costs, fewer students received contract monies this year. Enrollment in Boston University's Physical Therapy program has been dramatically reduced. Boston University did not, therefore, participate in this aspect of the Contract Program this year; all 92 Physical Therapy students are enrolled at Northeastern University.

Enrollment of contract students at the New England College of Optometry continues to grow steadily, from 29 students in 1977-78 to 42 in 1978-79. More dramatic growth is evidenced in the Regional Veterinary Medicine Contract Program. A total of 90 New Englanders are now enrolled at the University of Pennsylvania School of Veterinary Medicine and the New York State College of Veterinary Medicine at Cornell. In 1979, the Regional Veterinary Medicine Contract Program will be further expanded, with students also enrolling in the Tufts University School of Veterinary Medicine.
